Side FX feat. Kim Cameron | Music Review and Giveaway

Article By: [Kelli](#)

"It takes a real understanding of music to make such a combination work, and Side FX does just that." Country. Reggae. New Wave. Jazz. Rock. You wouldn't expect to find such an eclectic mix of genres on one album, would you? Probably not unless it was a compilation album. But if you have an eclectic taste in music, are interested in something familiar-yet-unique, or love to discover something new, then Side FX should be right up your alley.

It's hard to pin down where Side FX fits in — it sprawls across genres like a wave crashing on the shore shifts the sands. But the combination isn't as clumsy as you might suspect. It takes a real understanding of music to make such a combination work, and Side FX does just that.

So who is this band, and why do they have such a unique style? The frontwoman, Kim Cameron, gave up her life in the corporate world to pursue her passion — music. She hooked up with an international group of musicians with varied tastes and styles, and Side FX was born. Kim's voice is soul-soothing and her lyrics heartfelt.

If you're curious, check out SideFXband.net — you can hear samples of music, see videos, and more.

But two lucky readers will get a free CD of Side FX's debut album: *Contradictions*, **autographed** by Kim Cameron! Just leave a comment below and you'll be entered to win. The contest ends October 12 and winners will be announced October 13!
