

Female Celebrity Style: Kim Cameron

Kim Cameron is a woman who can't live with her black eyeliner which is a staple in her morning routine.

Kim Cameron is the spunky lead singer of Side FX. The glam diva once had her own fashion column for the Washington DC Examiner but what has me buzzing today is her female celebrity style.

Once I saw a pic of Cameron I immediately thought, "Stevie Nicks". Upon more research I discovered that not only is the legendary Stevie Nicks Cameron's inspiration but her style is synchronized with the classic elegance of Carole Lombard. Cameron is a huge fan of Lombard and considers her a beauty icon.

In this pic Kim is serving us urban chic and Parisian romance. What a laid back approach to style that is youthful and whimsical.

Cameron style has been describe as urban chic and Parisian romance. She's know for her accessories and loves jewelry to glam up her look before hitting the stage. However, before her look is completed she adds glitter which makes sets the fashion tone for magical and fun. Cameron is putting her own twist on how style and fashion is defined and you've gotta respect that.
