Children's Audio Book | Seaper Powers - The Mystery of the Blue Pearls  
by Kim Cameron

## Seaper Powers by Kim Cameron

When you take a minute to day dream of a warm, beautiful climate it's most likely somewhere tropical that you send yourself to. Maybe it's even St. Thomas? Kim Cameron's new audio book takes children's minds to a whole new world with a talking starfish and octopus under the sea in St. Thomas as a diver named

Emma sets out in search of mysterious blue pearls. Emma is hired by NOAA to help them with their research to determine the cause for the creation of these mysterious blue pearls. Along her journey, Emma discovers a secret that cannot be found out. If this secret is found it, it might destroy the world. Emma relies on the help of her trusty octopus and starfish friends to help her save the sea.

This is the second book in Kim Cameron's Seaper Powers series and a great one for kids ages three and up. I really enjoyed the audio book because I was able to sit with my daughter and relax while someone else read the story. I really enjoyed hearing the different voices of each character and the Caribbean music at the end of each chapter. My daughter and I were able to follow along with the PDF version of the book which has fun illustrations to help us picture the characters

and scenes. Having traveled to the Caribbean quite a bit, we can definitely relate to this story. You can't help but think of vacation when you listen to this audio book.

Whether you are in search of a great paperback story for your child for his/her Easter basket, or looking for a bedtime story that you don't necessarily have to read aloud, you should definitely check out Seaper Powers, The Mystery of the Blue Pearls by Kim Cameron.
